Custom Order Request

16 Oct 2025, 16:28

Specification

 Budget US\$968.43 14 days delivery (30 Oct 2025)

Criteria

What I'm looking for is: The mobile application will be designed to provide users with a seamless experience in interacting with downloadable PDF documents, specifically allowing for the purchase, management, and reading of PDFs. The app will also facilitate food and drink pre-ordering and feature interactive advertising. A unique aspect of the app will be a timeline feature, allowing users to revisit PDFs they have previously purchased. Additional features like user logins, push notifications, and QR code scanning will ensure an engaging and personalized experience. This document will outline the functionalities and modules of the app, describing how they interconnect to provide an intuitive and efficient service.

In detail, that is:
Functional Requirements

1. User Login and Profile Management

Description:

The app will require users to log in upon startup. The login feature allows for the collection of user data, which can be utilized for marketing and user engagement purposes.

Components:

- Login Screen: Users will input their credentials (email, password) to gain access to their personal accounts.
- User Profiles: Once logged in, users will have access to their profile where they can manage their account information and preferences.
- Data Collection: This data can be used for tracking user behavior, personalizing offers, and providing push notifications.

Integration:

- The login process integrates with the timeline feature to store user history and preferences.
- The push notification system can also be linked to the user profile for personalized alerts.

2. Home Page

Description:

The home page will serve as the main navigation hub for the app. From here, users can access various features such as the QR code scanner, food and drink pre-ordering system, and PDF library.

Components:

- QR Code Scanner: A quick access feature for scanning QR codes that link to PDF downloads or pre-ordering pages.
- Pre-order Food & Drinks: A hyperlink to a website or integrated system that allows users to order food and drinks ahead of time.
- PDF Library: A catalog of PDFs that the user has downloaded, purchased, or accessed previously.

Integration:

- The QR code scanner works with the PDF display feature by linking QR codes to specific PDF downloads.
- The food & drink pre-ordering feature might integrate with external systems for easy transaction management.

3. QR Code Scanner and PDF Management

Description:

Users will be able to scan QR codes to ac

Create an offer

Me

Hello Anton,

Thank you so much for the juice!

I'm excited about the opportunity to create your application and am confident I can deliver it to perfection.

If you have a bit of time, I'd love to dive deeper into your app's features. Understanding the core of your application is crucial to ensuring the best possible outcome.

Would it be possible to schedule a meeting to discuss everything in more detail?

Looking forward to your response!

Best regards,
Mahmud

Me

Hello Antony Curtis,

Thank you for considering my services for your application development project.

Based on your requirements and objectives, I have prepared a comprehensive quotation that outlines the services included, as well as the overall project scope.

Quotation Link:

<https://docs.google.com/document/d/16SKVYNu5D66umXmh67QLvkh02X4QGL7wLtrVn18vE/edit?usp=sharing>

Please review the detailed quotation for all information on the project scope, timelines, and cost breakdown.

Note: I don't require full p-ayment upfront; instead, I use a milestone-based p-ayment structure.

This means you only p-ay as each stage of the project is completed, ensuring flexibility and trust throughout the development process.

...24/7 Availability for Assistance

My team and I will be available 24/7 to assist you with any inquiries or concerns, ensuring continuous support.

...Regular Development Updates

Weekly progress reports will keep you informed on milestones reached and tasks ahead, ensuring full transparency throughout the project.

...Weekly Check-In Meetings

We will schedule weekly meetings to discuss progress, review feedback, and make necessary adjustments to keep the project on track.

...Additional Services: Rigorous Quality Assurance & Testing Comprehensive testing during the development phases to deliver a flawless, bug-free app. ...Seamless App Store Deployment Full deployment support for Android app stores to ensure a smooth launch. ...Post-Launch Updates and Support Ongoing post-launch assistance to resolve any issues or make improvements as needed. I am confident that we can build a successful product tailored to your needs. Should you have any questions or need further clarification, feel free to reach out. I look forward to your feedback and the opportunity to collaborate on this exciting project. Best regards, Mahmud	18 Oct 2025, 18:09
Me Hello Antony, I hope you're doing well! I wanted to follow up on the quotation and details I sent earlier. If you have any concerns or questions about the project scope, timeline, or any other aspect, please don't hesitate to share them. I'm more than happy to discuss and adjust anything to ensure we're aligned and moving forward smoothly. Looking forward to hearing from you! Best regards, Mahmud	22 Oct 2025, 18:38
Me Hello Antony, I hope you are doing well. Is there any update for me? If you have a concern about price, feel free to share your final price so that I can talk with my team and if double we will make something amazing for you with the best quality. Looking forward to hearing from you. Regards, Mahmud	28 Oct 2025, 18:42
Me Hi Antonycurtis, Hope you're doing great! 🍀 Just wanted to follow up on the proposal I sent for your Mobile application. I'm really excited about this project; it has amazing potential! To make it even better, I'm offering a \$500 special discount this month only 🎁 If we confirm the project by October, you'll get the same milestone plan and full 150-day support at a reduced cost. Would you like to schedule a quick call to review everything and lock in the offer? Best, Mahmud	01 Nov 2025, 16:59
antonycurtis Hi Abdulla, thanks for your patience. I have some questions regarding the app, timings and additions. 1, with regard to hosting the backend, where will that be? On our website or other platform? 2, with regard to the ad behaviour and monitoring details, how will they be collected and where will they be stored for use? 3, an additional element is required for the app, that is that the timeline of PDFs needs to be on different category tabs that can be swiped through (Theatre, Music, Sports, Events, etc.). Please can this be added to the job. 4, can the time for this be shortened to 3 months? We have a budget of £5,000 so hopefully everything can be achieved within that.	01 Nov 2025, 17:16
Me Hello Antony, Thank you so much for getting back to me and for sharing these details. - The backend can be hosted on your own server or a managed platform like AWS. - The ad data and user behaviour will be securely stored in the backend database for easy tracking and reporting. - Regarding the category tabs (Theatre, Music, Sports, Events, etc.) – I'll discuss this with my team and let you know soon. - To shorten the timeline to 3 months, I'll also check with my team and update you shortly. Appreciate your time and clarity as always. Best regards, Mahmud	01 Nov 2025, 22:57
Me Hi Antony, Thanks for your message! To answer your questions: The backend can be hosted on your website or a platform like AWS/Firebase – whichever you prefer. Ad data will be collected securely and stored in a database, which you can access anytime. Yes, we can add the swipable category tabs (Theatre, Music, Sports, Events, etc.) to the PDF timeline. I can complete the app in 3 months or even sooner. With your flexibility on timing and regular updates, I'll make sure the app is high-quality and delivered within your £5,000 budget. Let me know if you'd like to discuss further. Excited to get started! Best, Mahmud	02 Nov 2025, 23:17
Me Hi Antony, I hope you're doing well. I just wanted to follow up on our previous conversation regarding the app development. I wanted to check if you have any further questions or if there are any adjustments you'd like to discuss before we proceed. If everything looks good on your end, we can begin finalizing the details and move forward with the project. I'm committed to delivering the app on time and within your budget, ensuring it meets all of your expectations. Looking forward to your feedback! Best regards, Mahmud	03 Nov 2025, 14:23
antonycurtis Hi Abdulla, thanks for your response. I do have another question - With regard to the PDF workshop	

area that you will build into the backend where videos, photo galleries and links can be added, how do you see that working?		
Me Hello Antony, There will be a dashboard for you, and from that you can manage upload videos, photo galleries, and links directly into the backend, with an easy-to-use interface for managing and organising content.		03 Nov 2025, 14:38
antonymcurtis Yes, but the PDF workshop area, how will the interactive elements be added to the PDFs? I'm trying to get a clear picture of how someone with a standard PDF will use that area to make it an interactive one.		03 Nov 2025, 22:03
Me Hello Antony, Thank you for your question. Please allow me some time to review this in detail with my team so I can give you a clear and accurate explanation of how the interactive elements will be added to the PDFs. I'll get back to you as soon as possible. Stay tuned.		03 Nov 2025, 22:07
Me ↩ Replied antonymcurtis 03 Nov 2025, 22:03 Yes, but the PDF workshop area, how will the interactive elements be added to the PDFs? I... Thank you for your question! To make the PDFs interactive, we will integrate features such as clickable links, embedded videos, and photo galleries within the PDF viewer. Users will be able to interact with the PDF directly within the app, with elements such as buttons or clickable images linked to the interactive content. We will ensure that the process for adding these interactive elements is user-friendly and easily accessible through the dashboard. This will allow you to update or enhance any PDF content seamlessly. Let me know if you'd like to explore this further or if you have any other questions! Best regards, Mahmud		03 Nov 2025, 23:12
antonymcurtis Hi Abdulla, thanks for that. I would like to explore it a little further to ensure that whoever has access to the back end can upload to their own section and be able to add those interactive elements and what that might look like.		03 Nov 2025, 23:23
Me Hello Antony, Thank you for your response. Yes, we can definitely structure it so that each user with access to the back end has their own dedicated section. Within that section, they will be able to upload their PDFs and add interactive elements such as clickable links, videos, and image galleries. We can design a simple, intuitive interface in the dashboard where users can drag and drop their content, select the type of interactive element they want to add, and position it within the PDF. This process will be straightforward, so no advanced technical knowledge will be required. If you like, I can prepare a quick mockup or walkthrough to show how this will look and function for end-users. Best regards, Mahmud		03 Nov 2025, 23:28
antonymcurtis Hi Abdulla, thank you for that. It would be great to see a mockup.		04 Nov 2025, 4:51
Me Thank you so much, Antony. Before we begin the project, I can create a mockup for you. Once you're ready to proceed, I'll send you an offer for the first milestone. After that, I can start working on the Figma design based on the features we've discussed. If needed, I can also provide a clickable prototype. Let me know if you're ready to move forward and if you'd like me to send you the offer for the first milestone. Looking forward to hearing from you.		04 Nov 2025, 4:56
antonymcurtis Can you also tell me about how you intend to overcome the fact that using Stripe for digital goods or services sold within the app, you must use Apple's in-app purchase system. Does that mean that the Apple Pay system - and NOT Stripe has to be used?		04 Nov 2025, 17:31
Me Great question! For digital goods (like PDFs) on iOS, we'll need to use Apple's in-app purchase (IAP) system instead of Stripe to comply with Apple's guidelines. For physical goods or services (like food orders), Stripe can still be used. Let me know if you need more details!		04 Nov 2025, 17:42
antonymcurtis Thanks, since it is for digital goods (PDFs) then I guess it's Apple's purchase system we need to use.		04 Nov 2025, 17:53
Me I'm really glad that it helps you to make a quick decision.		04 Nov 2025, 17:54
antonymcurtis Hi Abdulla, I have created a document to list all the features we have discussed. Please can you take a look to make sure I have covered everything. Pocket Pro... (103.45 kB)		04 Nov 2025, 18:43
Me Thank you so much for sharing your requirements again, as we discussed. Please allow me some time to review carefully, and I will confirm with you soon.		04 Nov 2025, 22:54

to take 3 to 4 months for completion. Please review the quotation and let me know if you have any questions or would like to discuss further. Looking forward to your feedback! Best regards, Mahmud		
antonymcurtis	Hi Mahmud, thank you for that document. We are almost ready to proceed but there are several things within the proposal that I would like to go through and adjust/expand. These are:	17 Dec 2025, 19:09
antonymcurtis	Page 7: QR Code Scanning and PDF Management section - The PDFs need to adjust to fit the mobile screen device size being used by the user.	17 Dec 2025, 19:11
antonymcurtis	Page 7: Library - The Library and the Timeline Feature (on page 8) should be the same thing. A beautifully designed, 3D timeline of past events & programmes that they can scroll through and select.	17 Dec 2025, 19:12
antonymcurtis	Page 9: Content Management - Again, PDFs need to adjust to mobile screen size with a function for full screen view. So the management of them needs to show/adjust for the change in screen size from A4 PDF to mobile.	17 Dec 2025, 19:14
antonymcurtis	Page 9: QR Code management - Venues should also be able to set the prices of the PDFs they upload.	17 Dec 2025, 19:14
antonymcurtis	Page 9: Ad Management - What metrics are being tracked and how will they be displayed?	17 Dec 2025, 19:15
antonymcurtis	Page 10: Admin Panel - The admin panel needs to be able to manage which venues have access to - Ad Data, - Push notification ability. The admin needs to be able to switch these features on or off for each venue.	17 Dec 2025, 19:16
antonymcurtis	Page 10: Pricing and Payment Management - As mention, venues also need to be able to set prices of PDFs. Also, the payment gateway for purchase needs to go from the App - to our Website to purchase outside of App - and back to App seamlessly. The app is exempt from Apple royalties but only if we take payment outside of app. Therefore the integration of payment needs to be done on the website with little barriers for the user.	17 Dec 2025, 19:19
antonymcurtis	Looking forward to speaking about these details soon.	17 Dec 2025, 19:19
Me	Thank you so much for sharing, I'm reviewing, and I'll let you know the update soon.	17 Dec 2025, 19:23
Me	Hi Antony, Thanks for your detailed feedback! Here's my response to each point you mentioned: Page 7: QR Code Scanning and PDF Management We will ensure that PDFs adjust to fit different mobile screen sizes. There will also be a full-screen option for better viewing. Page 7: Library and Timeline Feature We'll merge the Library and Timeline into one feature with a beautiful 3D timeline. Users can scroll through past events and select them to view more details. Page 9: Content Management PDFs will be designed to fit mobile screens, and a full-screen option will be available for easy viewing. Page 9: QR Code Management Venues will be able to set their own prices for the PDFs they upload. Page 9: Ad Management We will track ad metrics like clicks, views, and user engagement, and these will be displayed in the admin panel for easy access. Page 10: Admin Panel The admin will be able to manage which venues can access ad data and send push notifications. You can turn these features on or off for each venue. Page 10: Pricing and Payment Management Venues will be able to set their prices for PDFs, and we'll make sure the payment process flows smoothly from the app to the website and back without any issues. This will avoid Apple's royalties while making it easy for users to purchase. Let me know if you have any more questions, and we can discuss further. Best regards, Mahmud	18 Dec 2025, 0:26
antonymcurtis	Hi Mahmud, that's great, thank you for that. There's another thing that I need to adjust. I need the Admin panel to also have control over turning on or off the ability for venues to put recommendations of restaurants and accommodation. The Admin can put recommendations on themselves or can allow venues to add their own. Thank you. I think we're almost there!	20 Dec 2025, 18:12
Me	Hello Antony, Thank you for the update. I can certainly add the ability for the Admin to control whether venues can add their own recommendations for restaurants and accommodation. This will be implemented as per your request. Please feel free to let me know if there's anything else you'd like to adjust. Best regards, Mahmud	20 Dec 2025, 18:24
antonymcurtis	That's great. There are a few more controls we'd like to have which might be better to discuss in the New Year. here is a list of the controls and I will produce a more detailed summary of soon.	22 Dec 2025, 17:31
Me	Thanks for the update. That sounds good. We can definitely discuss the additional controls in the New Year, and I look forward to receiving the more detailed summary. Please don't hesitate to reach out whenever you're ready, and we can continue from there. Best regards, Mahmud	22 Dec 2025, 17:33
antonymcurtis		22 Dec 2025, 17:37

All of these are controlled by the Admin to allow venues to access these features or not:		
antonymcurtis Venue Page – Venues can brand their own pages Programme Uploads – Venues can upload, add interactive elements and manage their programmes Event Listings – Venues can list their events either individually or through a PDF listings programme Audience Feedback – Events have a 'like' button for users to use to keep track and feedback to venues Engagement Insights – Different levels of user behaviour data (clicks, time spent, views etc) Programme Adverts – Ability to include adverts in programmes Behaviour Tracking – Track user behaviour across all venues Local Recommendations – Ability for venues to add restaurants, accommodation etc Push Notifications – Ability to send a number of push notifications (set by admin) Location-Based Alerts – Ability for an automatic push notification when a user is near a venue Priority Discovery – Ability for venues to show higher or in a box when users are searching		22 Dec 2025, 17:37
Me Thanks for sharing the list of controls. Yes, I can confirm that these features can be controlled by the Admin to allow or restrict access for venues. We will implement all of these functionalities as per your requirements. Best regards, Mahmud		22 Dec 2025, 17:41
antonymcurtis Thanks Mahmud, that's great to know. We are forming the company as we speak and have investors that will be onboarded in January. We hope to start with you very soon after that.		22 Dec 2025, 17:43
Me Thank you so much for your update. I'm really glad to hear that. Once you are ready, please let me know. I'll be waiting for you to start the project.		22 Dec 2025, 17:45
antonymcurtis Hi Mahmud, Happy New Year I hope you managed to have a break over the holiday period. I have created a master specification sheet that brought together everything we have spoken about and adjustments. This should make it clearer. Please can you have a read and check the feasibility with your team.		07 Jan, 16:38
antonymcurtis 1 File  ↓ SHOWE – A... (347.29 kB)		07 Jan, 16:38
antonymcurtis The timeframe for this project to begin is dependent on how the pricing structure works. We have applied for a grant to pay for the development, but this is set to start at the end of March/beginning of April. Because it is a grant, we officially cannot start work on it until it has been granted - however, if you would accept full payment at the end of the project (instead of throughout), then we may be able to start earlier. Let me know your thoughts on the updated specification and the payment structure. Many thanks		07 Jan, 16:42
Me Thanks for sharing. Let me review this and get back to you with an update.		07 Jan, 16:45
Me Hi Antony, Happy New Year to you too! I hope you had a restful holiday season. Thank you for sharing the master specification sheet. I'll review it with my team and check the feasibility of the project. Regarding the payment structure, unfortunately, we can't proceed with full payment at the end of the project. However, once the grant is approved and you're ready to move forward, we can begin work right away. Please keep me posted, and I'm looking forward to starting as soon as everything is in place. Best regards, Mahmud		07 Jan, 18:33
antonymcurtis Hi Mahmud, no problem. Let me know what your team say. Speak soon. Tony		07 Jan, 19:23
Me Hey Tony, Thank you so much for your text. I already discussed with my team. There is no way we can't proceed with full payment at the end of the project.		07 Jan, 19:29
antonymcurtis Hi Mahmud, that's no problem. If you can discuss the updated specifications with them, I'll let you know when the grant is ready to go.		07 Jan, 19:37
Me Thank you for understanding. I've shared the updated specifications with my team and will ensure everything is aligned. Based on your update, there will be an additional amount added to the initial cost. The original cost was \$7,500 USD, and with the new requirements, the total will increase by \$800-\$1,000 USD. Once the grant is confirmed, we'll be ready to begin the project. Please keep me posted, and feel free to reach out if you need anything in the meantime. Looking forward to working together soon! Best regards, Mahmud		07 Jan, 19:42
antonymcurtis I'm sorry Mahmud, but I don't understand. I've not added anything, I've just put everything we've talked about into one form.		10 Jan, 18:30
antonymcurtis I'm sorry Mahmud, but I don't understand. I've not added anything, I've just put everything we've talked about into one form.		10 Jan, 18:30
antonymcurtis And the cost you quoted was \$7000		10 Jan, 18:32
Me		10 Jan, 18:34

Okay, I will explain. The whole project cost is 7,500 USD, and with the new requirements that you have shared with me, that would be 1,000 USD so the total cost of the project will be 8,500 USD.

Do you get that? now

antonymcurtis

10 Jan, 18:43

No, I do not. I have not added anything extra to the specification, and the price you quoted on the bottom of the spec you sent me was \$7000

1 File

⬇ Digital cont... (527.34 kB)

Me

10 Jan, 18:47

No worries, Tony. I'll adjust the price to \$7,000 USD as per your request.

Let me know once the grant is ready, and we can get started right away.

Looking forward to working together!

Best regards,
Mahmud

antonymcurtis

17 Mar, 16:03

Hi Mahmud, I hope you are well. We are closing in on the grant project start date and I wanted to touch base with you to finalise the plan.

From our last update, we have removed two of the large integrations that added over £2,000 to the costs (the transport API and the ticketing). That should make things much easier and more cost effective. We will look to use you at a later stage to add these features in but for now, we can do without.

I have mapped out more of the backend workshop process and module blocks that I would need to go through with you and your team to make sure that they understand what it should be and I also have a few questions for them about formats etc. I am using a designer to look at these blocks so there may be some three-way collaboration. Please can we arrange a meeting to discuss?

I have attached the latest project document as well as the module information blocks and also the timing engine.

Please have a read and let me know what the new reduced price for the project is now that the two large integrations have been removed. We can then arrange a meeting for us.

Many thanks

Tony

Me

17 Mar, 16:16

Hi Tony

Good Morning!

I hope you are doing well.

Thank you so much for sharing all the details with me and for your interest in joining a meeting.

Currently, I am in heavy traffic and going to my home. Can we schedule the meeting 3 hours later or tomorrow anytime?

We will discuss everything in the meeting.

Looking forward to hearing from you.

Regards,
Mahmud

antonymcurtis

17 Mar, 16:32

Hi Mahmud, no problem. Tomorrow would be great.

Shall we say tomorrow (Wednesday 18th) at 12pm GMT (which I think would be 6pm your time). Looking forward to speaking then.

Tony

Me

17 Mar, 16:34

Thank you so much, Tony, for your flexibility.

Yes, it's 6 PM my time.

I will send you the custom offer over here.

Me

18 Mar, 10:53

Hello Antony,

Hope this message finds you well. How are you?

Are you available for the meeting now? If not, please let me know your preferred time for the meeting.

Waiting for your response. Stay connected.

Regards,
Mahmud

antonymcurtis

18 Mar, 14:29

Hi Mahmud, I thought we said 12pm GMT (6pm your time). Is that still okay? Thanks

Me

18 Mar, 14:3

Actually, we are Muslims, as you know, we are muslim and 6 PM will be my iftar time after doing the full day fasting.

Is it possible to join the meeting now?

antonymcurtis

18 Mar, 16:26

Hi Mahmud, I'm not free until 12pm GMT, but I could do later if that helps?

Me

18 Mar, 16:32

Sure, take your time. Let me know when you're ready, and I'll share the meeting link.

antonymcurtis

18 Mar, 16:54

Hi Mahmud, When is a good time for you after the iftar? I don't want to get in the way of that, especially after a day of fasting.

Me

18 Mar, 17:02

Ok.

Let me know the time whenever you're free.

antonymcurtis

18 Mar, 17:33

Hi, I've finished my meetings early and am free now

Me

18 Mar, 17:36

It's iftar time here, brother.

Will you be free in an hour?

antonymcurtis

Shall we jump on a call at 2pm GMT (8pm your time) to give you time?

18 Mar, 17:4

Me

Yes.

It works for me.

See you.

18 Mar, 17:47

antonymcurtis

Shall I send a Zoom link or do you want to do it on here to record?

18 Mar, 20:01

Me

Can I send you the meeting link?

I would be better.

18 Mar, 20:04

antonymcurtis

Yes

18 Mar, 20:07

Me

Okay, give me a moment, please.

18 Mar, 20:11

Me

Let's meet up for a video call.

18 Mar, 20:12

Video call ended

Watch Recording

The call recording is ready and will be available for the next 30 days.

Edited

18 Mar, 20:13

Me

Thank you for joining the meeting.

I will give you the quote shortly.

18 Mar, 21:06

Me

Hello Antony,

Thank you for considering me for your project development needs. Below is a brief summary of the project scope and pa-yment terms:

Quotation Details:
https://docs.google.com/document/d/1YVvTCasC2eYfEalNP_k_rkvwzeCKDV3hODY7QZoePM/edit?usp=sharing

Pa-yment Terms:
Milestone-Based Pa-yments: Pa-yments are made upon completion of each project phase-no full upfront pa-yment required.

Flexible Structure: Ensures progress while providing flexibility.

Included Services:

- 180 Days Post-Launch Support: Full support for 180 days post-launch to address bugs or issues.

- 24/7 Availability: My team is always available to assist.

- Weekly Updates: Progress reports and regular check-in meetings to stay aligned.

- Quality Assurance: Thorough testing to ensure a smooth, bug-free app and website.

- App Store Deployment: Assistance with deploying the app to iOS and Android. And the website is published in your domain and hosting.

- Post-Launch Support: Continued updates and maintenance after launch.

I look forward to working together to create a fantastic app and website for your needs. Please reach out if you have any questions or need further details.

Best regards,
Mahmud

antonymcurtis

Hi, thanks for the meeting today and sending over the quote. There are some errors which I have highlighted and attached. With regard to the price, I'm a little confused. The earlier price for the same product that included 2 very large integrations was \$7,000. Now that I have removed those integrations the price should have gone down. When the integrations were included it added over \$2000 to the price, so I was expecting the price to go down by the same amount now they are taken out. Perhaps this is just an error. Please can you reconfirm.

Me

Thank you for your feedback and for highlighting the errors.

I will carefully review the quote and check the adjustments related to the integrations.

I'll get back to you shortly with the updated details.

Best regards,
Mahmud

18 Mar, 23:17

Me

Hello Antony,

This is Mahmud, and I'm back after reviewing your feedback.

Regarding the price, I understand your concern about the cost adjustment after removing the integrations.

While the initial price was higher due to the complexity of those integrations, I've factored in all necessary adjustments. However, as it's Eid-ul-Adha, I'd like to offer a special discount to show my appreciation for your patience. This offer will be valid for just two days, March 20th and 21st.

After discussing with my team, I can confirm that the cost for the project has been adjusted. With the removal of the integrations, I'm able to reduce the price by \$700. On top of that, the Eid offer will give you an additional discount of \$500, so the total cost now comes to \$8,200 - \$700 - \$500 = \$7,000.

I believe you're already familiar with the complexity of the project, as you've been researching it for the past 4-5 months. On Fiverr, for this type of application, the cost would be well over \$7,000.

19 Mar, 8:00

Please take your time to consider the updated quote, and let me know your final thoughts. I look forward to hearing from you!

Best regards,
Mahmud

antonymcurtis19 Mar, 14:49

Hi Mahmud, thanks for getting back to me, but I am still confused about the price. The same project was \$7000 when it included the two large integrations (they added \$2000 to the price). Now that the integrations are no longer required, the price should go down to reflect that. It has in the other two quotes we've received, yet in yours it has gone up before staying at the same price.

Me19 Mar, 14:59

Thank you for your response, and I completely understand your concerns.

It seems there might have been a bit of a misunderstanding. The removal of the integrations does not change the overall flow of the work; the project's complexity and the scope remain the same.

While the integrations were initially priced separately, the overall structure, design, and development effort are still aligned with the original scope.

I hope this clears things up. If you have any more questions or would like further clarification, feel free to reach out.

Best regards,
Mahmud

antonymcurtis19 Mar, 15:08

Can I ask then why the price increased by \$2000 when the integrations were added if the scope is the same?

Me19 Mar, 15:10

Can you please share which two integrations you are mentioning?

antonymcurtis19 Mar, 15:12

Yes, the Transport API that was going to feature on the Getting There section for users, and the Spektrix Ticket integration that would link our wallet to the venue's ticketing software.

Me19 Mar, 15:13

If you remember, we did the previous meeting only for the application. Now, you are looking at the website and app separately.

antonymcurtis19 Mar, 15:15

The previous meeting had everything that is in this one. If you look at the beginning of our conversations you can see that everything is the same (except maybe I have added more detail to the recent description). I will copy and past it for you to see and the price you quoted before the integrations.

antonymcurtis19 Mar, 15:19

I have attached your original quote for the work at \$4,500. Then we added the workshop area that took it to \$5,000. Then we added the two integrations which pushed it to \$7,000. Now the two integrations are no longer required yet.

Me19 Mar, 15:22

Thank you for sharing the quote breakdown.

Just to clarify, the initial quote of \$5,000 was specifically for the app. If you're only looking for the app, the cost would remain as originally discussed. However, if you now require both the app and website, the cost will be different, as it involves additional work and resources.

In our first meeting, we didn't mention anything about the website, but in our last discussion, the website was included. That's why the pricing has been adjusted accordingly.

Let me know your thoughts, and we can proceed from there.

Best regards,
Mahmud

antonymcurtis19 Mar, 15:38

Hi Mahmud, the website was in the first quote where the admin panel and analytics were being kept. We have a website, it's just the same admin panel and analytics with the workshop area that's required. Abdulla Mahmud

Yes, but the PDF workshop area, how will the interactive elements be added to the PDFs? I'm trying to get a clear picture of how someone with a standard PDF will use that area to make it an interactive one.

Thank you for your question!

To make the PDFs interactive, we will integrate features such as clickable links, embedded videos, and photo galleries within the PDF viewer.

Users will be able to interact with the PDF directly within the app, with elements such as buttons or clickable images linked to the interactive content.

We will ensure that the process for adding these interactive elements is user-friendly and easily accessible through the dashboard.

This will allow you to update or enhance any PDF content seamlessly.

Let me know if you'd like to explore this further or if you have any other questions!

Best regards,
Mahmud

Me19 Mar, 15:44

If you see the quote, you will see that the quote was for only the app.

Me19 Mar, 15:45

I really want to work with you.

Can you tell me how much you want to pa-y for the app and webiste as we discussed?

antonymcurtis19 Mar, 15:53

Hi Mahmud, I really want to work with you too so I'm going to be honest with you. We were expecting a grant to cover the costs for the development, but we didn't get it. This means that I have to fund this myself. With the removal of the two integrations I was hoping that it would go back to \$5000. However, I can see the value that your team brings so I could try and find another \$1,000 from somewhere to bring it up to \$6,000. Once we have launched and are bringing in revenue, we still want to use you to put those other integrations in as well as other features we have outlined, so for me, choosing the right developer is important as it will be a long-term collaboration.

Me

I truly understand your situation, and I appreciate your honesty. I'm glad to hear that you value the work my team brings to the table, and I'm happy to make this work for both of us.

So, can we do it for \$6,500 for both the app and the website, as discussed in our last meeting? You won't need to p-ay the full amount upfront, as we've set up a milestone-based p-ayment structure. The first milestone will be manageable and aligned with your needs, ensuring we make steady progress.

Let's move forward and create something great together! I'm excited to work on this with you. Looking forward to hearing back from you.

Best regards,
Mahmud

19 Mar, 16:02

antonymcurtis

Hi Mahmud, thank you for your understanding. The p-ayment structure would give me time to find the extra amount needed. I accept your generous offer of \$6,500 for the work with all the features mentioned. Would you be able to send the updated program of works with all the details from my specification? I'm keen to make sure we have everything aligned without anything falling through the cracks of using general headings or summarized lists.

19 Mar, 16:19

Hi Mahmud, thank you for your understanding. The p-ayment structure would give me time L.

Thank you so much.

Following our last meeting, I believe all features have been covered in the quotation I previously sent.

However, if there's anything missing, please let me know, and I will update it accordingly.

Additionally, I will revise the price to \$6,500 USD.

Looking forward to hearing from you.

Best regards,
Mahmud
